THEMES

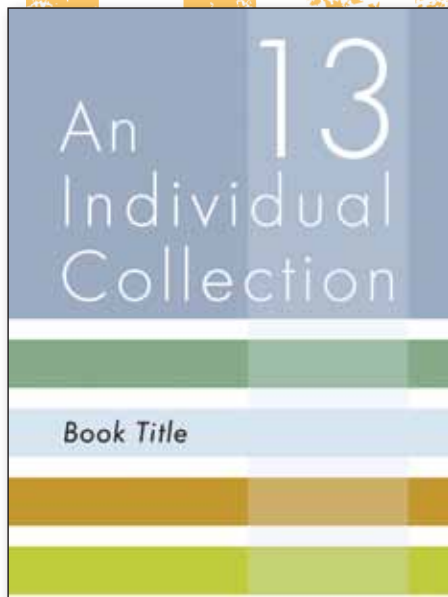

Templates

Give your yearbook a coordinated “whole book look” with the new themes templates recently added to the Page Surfer collection. From the title page to the parting page and everything in between, these contemporary designs allow your staff to jump right into covering the story of the year in pictures and words.

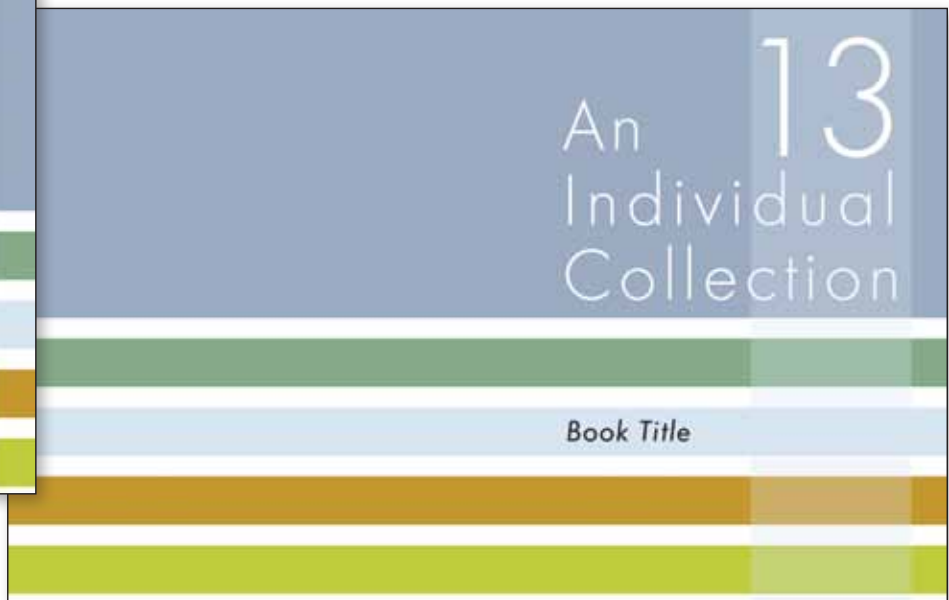

THEMES

Jostens YearTech® Online

To access the new themes templates, go to the Designs tab in the Yearbook Avenue Page Designer and click on the Page Surfer link. Under the Themes heading, you'll see the nine themes. When a theme is selected, a list of section templates for that theme is displayed.

Jostens YearTech

Select the category and then select a page design. Page Surfer Placement allows you to select the left and right pages independently so you can mix and match Page Surfer designs and leave pages blank for your own creations. Even-numbered designs are constructed for left-hand pages and odd-numbered designs for the right. With YearTech, you can switch sides for the designs and the layout will flip automatically when placed. The Page Preview window on the right shows what the spread will look like.
